"WHY ARE WE DOING THIS STUDY?"

CPIC Helps build a village for depression care by providing training on how agencies can improve depression care in our community.
Care providers receive partners in care resources at a community workshop, which includes training for administrators, health care professionals (medications), therapists (cognitive behavioral therapy) and community outreach / care management on how to deliver depression care in your agencies.

Welcome to the community partners in care community workshop.
RESOURCES FOR SERVICES (RS) WILL ALSO HAVE ACCESS TO ONLINE RESOURCES FOR DEPRESSION CARE TO LEARN HOW TO CARE FOR DEPRESSION.

AND OTHER FOLLOW-UP SUPPORT, LIKE TECHNICAL ASSISTANCE VIA TELEPHONE TO USE CPIC RESOURCES IN THEIR AGENCY TO ADDRESS DEPRESSION.

WHAT PRACTICES WILL I NEED TO CHANGE?

HOW DO I SUPPORT STAFFING TO IMPROVE DEPRESSION CARE?

IS THE MEDICATION THE RIGHT CHOICE?

...I THINK YOU ARE DOING A REALLY NICE JOB OF REFRAMING YOUR CLIENTS' NEGATIVE THOUGHTS.
There is also the 'Community Engagement and Planning' (CEP) approach...

...where agencies plan together over 4-5 months to see if they can adapt the materials and build a network to improve depression care.

We need to share information. Can we work together? Can we create a network that treats depression?

Community Partners in Care

Community Engagement and Planning (CEP)
Each agency will be assigned by chance or randomly to either 'RS' or 'CEP'.

We want a fair comparison to make sure that agencies in either condition are as similar as possible at the start. :)

Community partners in care.
WE WILL EVALUATE HOW CPIC WORKS.

BECAUSE WE DON'T KNOW WHICH APPROACH IS BETTER (RS OR CEP), WE WOULD MEASURE WHICH GROUP PROVIDES BETTER DEPRESSION CARE OVER TIME.

...AND HOW AGENCIES IN RS OR CEP CARE IMPACTS CLIENTS' DEPRESSION OVER TIME...

...AND WHICH CLIENTS FUNCTION BETTER OVER TIME.
AFTER LOOKING AT OUR STUDY DATA, WE (ALL STUDY PARTNERS AND PARTICIPANTS) WILL RE-TRAIN THE COMMUNITY (NEW PARTNERS) IN WHICH APPROACH, 'CEP' OR 'RS', WORKS BETTER TO IMPROVE CLIENT DEPRESSION OUTCOMES.

WE WANT TO SPREAD THE GOOD NEWS ABOUT WHICH IS BEST FOR DEPRESSION CARE.
